TUG'N'TRAILOR SAFE BIN RE-LOCATION SYSTEM

Ph: +61 2 6622 7111 email: info@wrightway.com.au Web: www.wrightway.com.au

An ideal solution for facilities with large (600 litre +) or multiple waste bins (80-240litre wheelie bins) which need to be regularly moved for emptying.

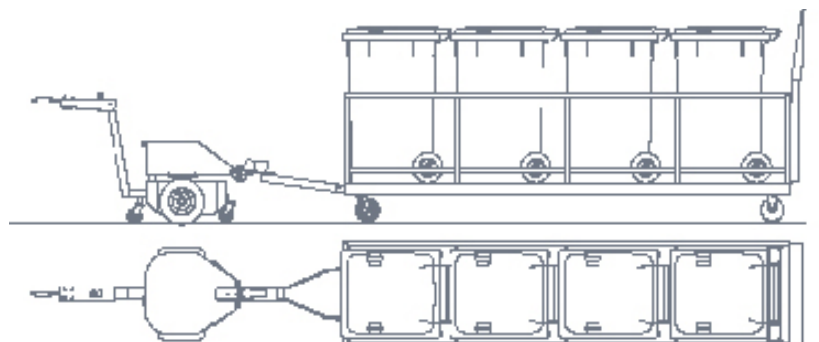

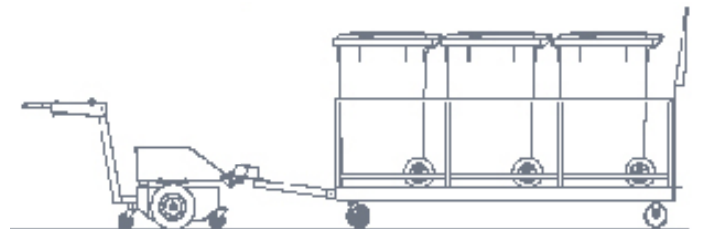

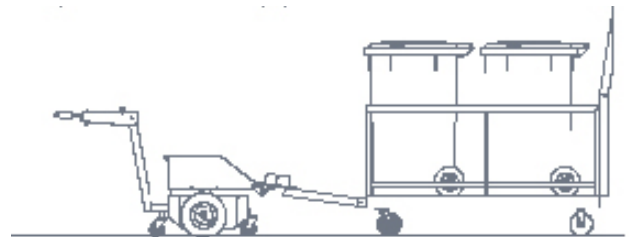

Allows one person to quickly and effortlessly move waste bins to a centralised area, letting the battery powered Tug do all the work.

Tug can be attached directly to your large waste bin or to our Trolley (application dependant on capacity). The Trolley can carry a variety of waste bins and can be customised to suit the needs of your facility.

An ideal solution to reduce OH&S risk and time your staff are spending on moving waste bins around your facility.

Typical applications: Moving of large bins or multiple wheelie bins to a centralised pick up area.

Typical users: Apartment buildings, schools, sports grounds, hotels, universities, and institutions.

FEATURES

- Tug and/or Waste Bin Trolley
- Customised solutions to suit your facility (Solutions for 8+ bins)
- Easily traverses outdoor terrain and is weatherproof
- Electric powered: 24V gel cell batteries, zero emissions
- Equipment training and servicing programs available
- Simple to use, no driver's licence required
- Comprehensive 12 month warranty on all equipment
